

IMPACT REPORT

July–December 2019

Thank you! Because of your faithful support, 2,043 babies have been rescued!

Thank you for partnering with us to reach hurting women, rescue their children, and restore their families to stability. Because of your help, Human Coalition has grown to be one of the largest life-affirming ministries in the country, utilizing holistic care, compassion, data, technology, and innovation to rescue children and families from the grip of abortion.

However, as you know, approximately every 30 seconds a child is still being aborted in America—making abortion the greatest genocide in our history. The need for us to rapidly advance our National Rescue System is great. And the need to connect women and families to compassionate care is imperative. Because of your help, those very things are taking place. But we have so much further to go.

Since God made each of us in His image, He desires that none should perish, but rather enjoy the gift of abundant life. This is why your help has been so valuable in growing our virtual clinic—perpetuating dignity and the value of life. Each time you invest in life, and a child and family are rescued from abortion, you become a part of the work of restoration.

While this healing work is initiated by the Creator, it often involves a partnership with people like you. Your support has helped restore children, giving them the opportunity to grow up, live life, and love. Your prayers and giving have helped countless mothers and families move beyond their current crises to choose life.

Thank you for your partnership, and may God bless you!

“Brielle” Needed Support, Help, and Hope

“Brielle” battled postpartum depression after the birth of her first child. So, when she took a positive home pregnancy test three years later, she feared the worst. She didn’t think she could handle struggling through the darkness of a postpartum depression all over again.

As a single mom to a toddler boy, Brielle knew the joys of parenthood. But she also knew the struggles. It seemed there was never enough money. She had just moved to a new town and didn’t have any support. This further complicated her feelings of being all alone. As she reflected on her last experience with depression, she remembered the consuming darkness she felt. As she replayed the hopelessness in her mind, anxiety welled up within her. Not knowing what to do, Brielle sought advice from her sister and the father of her baby. Both advised Brielle to abort her child.

Feeling terribly alone and scared, Brielle searched online for information about abortion and found the number to our virtual clinic. She was put through to “Dawn,” a nurse at the clinic. Brielle shared with her that she had planned to use her next paycheck to pay for an abortion saying, “My head and my heart are saying to abort.”

Daycare dues, utilities, and grocery bills drained Brielle’s bank account each month. To help meet one of her immediate needs, the staff at the virtual clinic sent diapers for Brielle’s son.

In the days to come, Dawn stayed in touch with Brielle and helped her set an appointment at a

nearby pregnancy resource center to confirm her pregnancy. When Brielle saw her baby’s tiny feet on the ultrasound and heard her baby’s strong heartbeat, everything changed. For the first time since she took a positive pregnancy test, Brielle felt a peace that she could find the help she needed, choosing life!

GREAT THINGS TO COME

Brielle sent Dawn a text to share the news that she had chosen life for her baby, and Dawn replied, “I believe great things are to come!” Dawn connected Brielle with “Chandler,” the Care Coordinator of the virtual clinic. When Chandler learned Brielle

wanted to find a better job, she helped Brielle improve her resume and search for jobs. Not long after, Brielle started a new job that provided her with full insurance benefits.

Through our Continuum of Care program, Brielle enrolled in our car seat program. She also received diapers, a breast pump, and information on local resources where she

could get the materials she needed to provide the best care for her baby.

A BEAUTIFUL, WIDE-EYED BABY GIRL

This spring, Brielle welcomed a beautiful, wide-eyed baby girl, “Maya.” Proud big brother asks to hold his baby sister and keeps her entertained, surrounding her with toys. Under the care of her OBGYN, Brielle is healthy and enjoying cuddles with Maya. And when Maya’s around, Brielle can’t stop smiling.

The virtual women’s clinic helps women and families, no matter where they live in the state of Texas and in other areas around the country as we expand.

Through your ongoing support, we reach mothers like Brielle so they can experience the joy of parenting.

10 YEARS OF LIFE-SAVING WORK

We are so thankful for YOU!

You are paving the way to innovative and exponential growth, helping us reach even more hurting women, rescue more preborn children, and restore more families to wholeness than ever before!

*498 children rescued from abortion in 2019 by Human Coalition's life-affirming pregnancy center partnership clinics across the country.

It's hard for me to imagine that Human Coalition just completed its 10th year of life-saving work.

Born out of an idea to use technology to reach women in crisis pregnancies back in 2007, I started Human Coalition as a side project with a friend in 2009. With over 1.8 million Internet searches a month in the U.S. for phrases such as “abortion clinic,” “abortions at home,” and “morning after pill,” we knew that the Internet was ground zero for reaching hurting women and rescuing babies.

What started as a volunteer side project in 2009 became a full-time effort in 2012. God had bigger plans for Human Coalition than I ever did!

Back then, I never would have imagined Human Coalition would grow to be one of the largest life-affirming ministries in the country, rescuing more than thousands upon thousands of children from abortion genocide. I never would have imagined we would expand and expand and expand!

Back in 2009, we had one simple job – find women at risk to abort online and connect them with life-affirming, Christ-centered pregnancy centers. Then in 2013, we added our contact center. In 2014, we added our own comprehensive clinics. Then in 2016, we built our crucial social support program, Continuum of Care. And in 2018, we launched the virtual clinic to reach women even faster with immediate care.

Though Human Coalition's team of over 160 staff members is the best of the best, growth and expansion like we've experienced can only be explained by the movement of God. He is rescuing His children and expanding His Kingdom through the hands and feet of the Gospel.

If you are reading this Impact Report, you are a pivotal part of the Human Coalition story. At some point, God moved in your heart to join us as we cooperatively and collaboratively end abortion, restore families, seek justice, and

promote human value and dignity – all for the glory of our Lord.

On behalf of the entire team at Human Coalition, thank you for so faithfully and generously supporting this work. We cannot rescue babies and serve families without your partnership, and it is our honor to serve with you in this effort.

You recognize the inherent dignity and value of every human being, from conception through natural death, and you have acted on your belief. And the Lord is using you to rescue His image-bearers. Let's press on!

For Life!

Brian

We'd love to hear from you!

Connect with us and let us know how your life has been impacted by investing in the work of rescuing children and serving families. [HumanCoalition.org/MyStory](https://www.humancoalition.org/MyStory)

We want to equip you with truth.

Be sure to tune into Brian Fisher's weekly podcast, *The Human Element Show*, [TheHumanElementShow.com](https://www.TheHumanElementShow.com), where he tackles the difficult questions and dilemmas facing the pro-life movement today and equips you with truth.
